

CAREER SUMMARY

I am a Mechatronics Engineer with hands-on experience in Mechanical Design Engineering and Mechanical Engineering. I am proficient in 2D and 3D design, with strong expertise in AutoCAD, SOLIDWORKS, ANSYS, CATIA, and Siemens NX. I completed Bachelor Degree in China. And I recently completed a Master’s degree in Management of Information Systems in the USA. I am seeking entry level Mechanical Design or Mechanical Engineering position. I am highly motivated to learn in a new environment, particularly in areas focused on research, development, and innovation.

EDUCATION

Master of Business Administration – Management of Information Systems

International American University, Los Angeles, USA | Sep 2023 – Jul 2025

Bachelor of Engineering in Mechatronics Engineering

Hebei University of Technology, Tianjin, China | Sep 2019 – Jul 2023

CORE SKILLS

Mechanical Design & Drafting: 2D/3D, AutoCAD, SolidWorks, Catia, Siemens NX.

Analysis & Simulation: ANSYS (FEA), CFD, MATLAB, thermal & stress analysis

Manufacturing Processes: CNC machining, 3D printing, GD&T, sheet metal fabrication

Mechatronics & Automation: PLC integration, sensor design, prototyping, system troubleshooting

R&D & Product Development: Concept design, prototype evaluation, design modifications

Professional Skills: Problem-solving, technical communication, teamwork, cross-cultural collaboration, project coordination

PROFESSIONAL EXPERIENCE

Data Analyst | July 2025 - Present

Taskimpetus Inc. (New Orelans, LA, USA)

- Analyze healthcare data using AI and machine learning to find useful insights.
- Build predictive models and simple dashboards to help understand the data.
- Work with teams to support better decisions while keeping data private and secure.

Quality Assurance Analyst Intern | April 2024 – August 2024

Transfotech Global Corp. (Los Angeles, CA, USA)

- Test software and run UAT to make sure it works for the client.
- Work with the development team and research data to improve the product.
- Learn and use project management and CRM tools on real projects.

Mechanical Engineer & B2B Sales Engineer | January 2023 – August 2023

Oushangyuan Process and Equipment Intelligent Co. (Tianjin, China)

- Design reviews and verification for large-scale mechanical and EPC projects.
- Developed and validated 2D/3D engineering drawings for client approval.
- Coordinated with global clients during the pre-sale consultation, equipment selection, and process solution development, providing technical information, design recommendations, and customized B2B solutions.
- Gained practical experience with full production line systems and core processing equipment such as ion exchange systems, continuous chromatography, evaporators, and automatic control platforms used in deep corn processing and fermentation industries
- Collaborated with R&D, manufacturing, and global clients to ensure compliance with specifications.

Mechanical Engineer (Internship & Full-time) | Jul 2022 – Dec 2022

Hein Lanz Industrial Tech. Co. GmbH (Tianjin, China)

- Designed and developed 2D/3D models and drawings using **SolidWorks, AutoCAD, and Siemens NX** for sensors and automation equipment.
- Assisted in **new product development**, creating prototypes for client approval before mass production.
- Collaborated with senior engineers on **PLC integration** with sensors used in various heavy industry.
- Delivered customized design solutions to meet specific customer requirements.
- Great experience with team-work, time-management, project-handling.

CERTIFICATES

Best Paper Award Certificate IEEE MP SECTION

International Student Assistant Certificate
